We are manufacturing water related products. We are proud to be an Indian company because we build world class quality products, keeping in mind the needs and the ideology of Indian culture, as well as the habits of the user. It is our endeavour to deliver such high quality products to every home at a reasonable price.

Ionpot is one of the patent applied products for the drinking water in our homes that we are confident, will prove to be very useful in the fight against fastest growing diseases.

Before we provide more information about the Ionpot, it should be mentioned that this is not a water purifying equipment. The Ionpot cannot remove impurities or salts from the water, but makes it alkaline by adding required elements i.e. essential minerals in the water. So whatever technology or water purifier you use to purify the drinking water, you can use the Ionpot after that to improve the quality of the water.

The water that reaches our homes today contains a variety of impurities, which if not treated with RO or any other machine, can lead to many diseases. Therefore it is very important to use a purifier for water purification. At the same time, the Ionpot also remains an indispensable necessity by adding the essential minerals to the water.

Water purified by RO purifiers lowers the pH and TDS so the water becomes acidic. Drinking such acidic water regularly does not lead to proper digestion so that there is a deficiency of essential vitamins and nutrients from the food which can lead to diabetes, joint pain, blood pressure issues etc.

The use of Ionpot adds essential minerals like calcium, magnesium, sodium, potassium to the water. At the same time it turns the acidic water into alkaline water. Water purified by Ionpot has antioxidant properties, and is very helpful in fighting diseases like cancer.

The Ionpot is very easy to use and can be installed directly on the pot or on the wall. With the press of a single button, online alkaline ionized water is obtained. This comes with an inbuilt battery, so the use of constant power is not required.

- Turns Acidic water to Alkaline water
- Adds natural minerals
- Enhancing hydrogen level in water
- Negative ORP level
- Increases the effect of anti-oxidant
- Improves the taste of water.

* Oxidation Reduction Potential (ORP)

Specification

Product Name	ORG Ionpot
Service Life	2500 – 3000 liters
Flow	2.5 lpm
Battery Power	3600 mah
Full Charged Battery	200 liters
